SPECIFICATIONS

Brand	LUXION
Standard	German (Schuko)
Category	Build your own › Mechanisms › Doorbell, sensors, blank covers
Product type	Night light module with motion sensor
Function	Night light with motion sensor
Operating voltage	100–240 V AC
Frequency	50/60 Hz
Maximum load	60 W LED
Power	1.5 W
Range	Detection 6–10 m
Detection angle	90°
Colour temperature	1800–7500 K
Delay time	90 s, 180 s, 300 s
Colours	white, black, grey, gold

DESCRIPTION

LUXION night light module with motion sensor. LUXION products stand out for their compact, elegant and minimalist design.

They are practical, made from quality materials, built to last, and bring functionality and comfort to your

Features

Night light in module form, with a built-in motion sensor.

- Built-in motion sensor
- Detection range 6-10 m
- Detection angle 90°
- Delay times: 90s, 180s, 300s
- Compact, elegant and minimalist design

Technical parameters

Key electrical data of the module.

- Operating voltage: 100-240V AC
- Frequency: 50/60Hz
- Maximum load: 60W LED
- Power: 1.5W
- Colour temperature: 1800 - 7500 K
