SPECIFICATIONS

Brand	LUXION
Category	Smart home › Remote controls
Connectivity	RF433
Product type	Switch-type remote control, self-powered (kinetic, battery-free)
Operation	Wireless signal transmission powered by the button press
Number of buttons	3
Protocol	RF433
RF frequency	433 MHz
Compatibility	Luxion kinetic relay and other compatible 433 MHz devices (corresponding controller required)
Front material	Plastic
Colours	white, black, grey, gold

DESCRIPTION

The switch-type remote control operates at a frequency of 433 MHz and pairs with other compatible devices, such as the Luxion kinetic relay. It is easy to install and use.

It uses innovative self-powering technology: the energy generated each time you press the button is harvested and used to transmit the signal wirelessly. This frees you from the need for wiring and battery replacement.

It must be used together with the corresponding controller (receiver) and can easily be employed in a variety of scenarios, such as:

- switch controlling from one location
- switch controlling from two locations
- switch controlling from multiple locations
- wireless doorbell, etc.

Features

Wireless switch-type remote control with three buttons and self-powering technology.

- Operates at 433 MHz
- The energy of each press is converted into a wireless signal
- No wiring and no battery replacement
- Easy installation and use

Control and compatibility

Works in combination with the corresponding controller (receiver), such as the Luxion kinetic relay.

- Compatible with the Luxion kinetic relay and other compatible RF433 devices

Ideal for

Flexible wireless control applications.

- Control from one location
- Control from two locations
- Control from multiple locations
- Wireless doorbell
