–	LX-ZG-HB

SPECIFICATIONS

Brand	LUXION
Category	Smart home › Smart hubs
Connectivity	Wi-Fi, Zigbee
Product type	Smart Zigbee hub with Wi-Fi
Power supply	5 V / 1 A
Protocol	Zigbee, Wi-Fi 2.4 GHz
Range	50–60 m² per floor
Compatibility	Smart Life / Tuya app, IFTTT, Amazon Alexa; LUXION Zigbee switches (work only with this hub)
Front dimensions (W × H)	60.5 × 60.5 mm
Depth	16 mm
Operating temperature	-10 °C ~ 55 °C
Operating humidity	10% ~ 90% RH
Net weight	33 g

DIMENSION DRAWING

DESCRIPTION

The Luxion smart hub with Zigbee protocol is ideal for home automation. Thanks to its small size, it suits any type of room. It creates a smart system and offers comfort and flexibility, as it lets you control the switches directly from the app.

Caution! Luxion switches with Zigbee protocol work only in combination with the Luxion Zigbee hub.

Features

LUXION hub with Zigbee protocol, compatible with the Smart Life and Tuya apps and with the IFTTT service.

- Compatible with the Smart Life and Tuya apps
- Zigbee protocol
- IFTTT support
- Luxion switches with Zigbee protocol work only with the Luxion Zigbee hub

Smart and stable system

Devices using the Zigbee protocol are much more stable than Wi-Fi devices and can connect to many more smart devices.

App control

Change the atmosphere of your home with a single tap: open the Smart Life app and adjust the lighting as you wish. The Zigbee connection between the hub and the device is much faster.

Automations with IFTTT

You can easily set up different ways of activating electrical devices, which will then operate automatically once the relevant settings have been made.

- Example: fit and activate the sensors on the door; when the window is open, the sensors send a signal to the hub, which switches off the air conditioner

Voice control

You can control the hub with your voice via the Amazon Alexa voice assistant.

- "Alexa, turn on the light!"

Dimensions

- Dimensions: 60 x 60 x 15 mm
- Weight: 33 g
